

Integrator enables any business to send and receive documents with its trading partners electronically. These standard business documents include Purchase Orders, Advance Shipping Notices, Remittance Advices and Invoices.

A FLEXIBLE E-COMMERCE SOLUTION

Integrator 4 offers a flexible range of offerings and benefits that will enable a business to increase the efficiency of its supply chain.

- Efficient, paper-free administration of your ordering and purchasing activities with no need for manual re-keying of data
- A choice of Internet or standard dial-up drivers
- Automated processes with increased capacity to handle higher trading volumes
- Minimal set-up with pre-mapped incoming and outgoing documents, including Purchase Orders, Purchase Order Acknowledgements and Invoices
- Extensive profiling and translation features
- Automated integration into internal systems
- Conversion of shared data between trading partners to formats as designated and understood by each party
- Automatic Communications Scheduling with time management tools and event logging
- Provision of full audit tracking and message archiving capabilities
- Single or multiple company support allowing you to manage one or many companies in one solution
- Product and service support is provided by Global eXchange Services while expert Supply Chain Management and e-commerce consultants are also available

WHY CHOOSE GLOBAL EXCHANGE SERVICES?

In a fast-growing market like e-commerce, there are a lot of players. The difference between most companies and Global eXchange Services is our expertise in e-commerce and the supply chain. We have over 30 years experience in electronic commerce. Our customers include Australia's largest retail chains, small businesses, manufacturers of all sizes and the largest industry network in Australia, EANnet. When combined with new Web technology, this experience allows us to help every business, regardless of size, to easily move into e-commerce and achieve outstanding supply chain benefits as a result.
